Item Weight	: 3.52 ounces
Paperback	: 45 pages
Dimensions	: 7 x 0.11 x 10 inches

This book contains over 100 practice questions, each with a detailed answer and a step-by-step solution. The questions cover a wide range of topics, including:

* The definition of a matrix * The different types of matrices * Matrix operations * The determinant of a matrix * The inverse of a matrix

This book is also a great resource for students who are preparing for exams. The practice questions in this book are similar to the questions that are typically found on exams. By working through these questions, students can improve their understanding of matrices and determinants and increase their chances of success on exams.

Table of Contents

* Chapter 1: to Matrices * Chapter 2: Matrix Operations * Chapter 3: The Determinant of a Matrix * Chapter 4: The Inverse of a Matrix * Chapter 5: Practice Questions

About the Author

Dr. John Smith is a professor of mathematics at the University of California, Berkeley. He has over 20 years of experience teaching mathematics to students at all levels. Dr. Smith is the author of several other books on mathematics, including "Calculus for Beginners" and "Algebra for Dummies."
